The two attachments reflect the jobs held in DDP/PC on 2 January 1970 for authentication and for coordination as indicated.

Attachment A - Held for authentication.

Only one job (5911 - on R & R Travel) of the 1 November listing has been returned to RCB. This was returned on 15 December 1969. Since 1 November the total number of jobs in DDP for authentication has risen to 18, an increase of 6 over the 1 November total. These figures pertain only to jobs held in DDP on 2 January 1970, however; they do not indicate the total number of jobs in process. In December we sent to the plant 39 jobs, 8 of which were authenticated by DDP.

Attachment B - Held for coordination.

Fifteen of the 25 jobs listed in the 1 November 1969 report have been returned. However, as of 2 January 1970 there were 30 jobs held in DDP for coordination, an increase of 5 over the total held on 1 November 1969. By comparing the 2 January totals with those updated on 1 November it appears that we are making absolutely no progress in breaking the DDP/PC log jam. In fact we are taking one step forward and two steps backwards. I cannot account for this lack of action on the part of DDP. has advised me that one of his editors left his shop during this reporting period, but looking

over his production for the past eighteen months, I cannot see where this makes any difference.

In view of their no progress, I believe that we should follow through on the procedures practiced by State of establishing prior target dates and going ahead when the coordinator fails to respond by these dates, or fails to request, for valid reasons, an extension of these dates.
